ANNUAL INDEX

Volume 82
2005

Subject

A

Acidolysis, of n-3 fatty acids with hazelnut oil, 27, 28, 29, 32
Aldehydes, in food-grade rice bran wax, 57, 61
Alkyl esters, enzymatic production of, with lipases and alcohols, a critical evaluation, 341
Ambrette seed oil, safety evaluation of, 749
Amino acids, in *Lesquerella fendleri*, 53, 54, 55, 62
Amino hydroxy triglycerides, facile synthesis of, 207
Amphiphiles, adsorption of, at oil–water vs. oil–metal interfaces, 285
Arachidonic acid, purification of, with lipase, 833
Atomic force microscopy, to measure bloom in chocolates, 165
Autoxidation, of oil by heme iron, 579

B

β′→β polymorphic transition in food fats, 7, 11
Beef lipids, determination of total lipids to compare chlorinated and low-toxicity solvents, 393
Biodiesel
  biosynthesis of sophorolipids from co-product streams, 625
  from soybean oil using ultrasonic mixing and alkaline transesterification, 525
  optimization of *Brassica* methanolysis for production of, 899
  oxidative stability by the oil stability index (OSI), 381
  oxidative stability by thermal analysis and Rancimat, 519
  production of fatty acid isopropyl esters from, 839
  properties and nitrogen oxide emissions of, from animal fats, 585
  viscosity and temperature dependence of, 195
Bleaching
  of oils, a kinetic model for, 537
  of rice bran wax, 57, 58, 59, 60, 61, 62
Bromthymol blue (BTB) method, to assess virgin olive oil color, 21, 22, 23, 24
Buckthorn berries, composition of phenolic acids from, 175

C

Canola
  determination of fatty acids in, and in flax and solin by near-infrared spectroscopy, 153
  effect of sprouting on quality and composition of the seed and oil, 511
Canola oil
  oxidative stability of, by headspace analysis, 869
  stability of water-in-oil emulsions with, 159
Carotenoids, in virgin olive oil, 33, 35
Castor oil
  hydrogenation of, using limonene, 279
  production of conjugated linoleic acid isomers by dehydration of, 261
Chlorophyll
  derivatives in virgin olive oil, 33
  pigments in virgin olive oil, 38
Chocolate, storage of and effects on surface roughness and use of fractal analysis, 457
Cholesterol, prevention of, oxidation in cooking oils during heating, 243
Cocoa butter, effects of supercooling on crystallization of vegetable oil blends with, 471
Cocoa butter substitutes, production of, from fractionated palm kernel oil, 783
Cod liver oil, autoxidation of, with tocopherols and ascorbyl palmitate, 97
Coffee, fatty acid evolution during the storage of, 639
Conjugated linoleic acid (CLA)
  determination of, in seed oils grown in Turkey, 893
  effect on cellular lipids of yeast, 745
  production of, by dehydration of castor oil, 261
Corn germ, composition of fractions from modified corn-processing technologies, 603
Corn oil
  composition of, from the alcohol extraction of ground corn, 809
  determination of, content in kernels using nuclear magnetic resonance imaging, 855
  effects of randomization of, on oxidative stability, 111
  influence of moisture content and cooking on screw pressing and prepressing of oil from germ, 851
  recovery of, from ethanol extracts by membranes, 221
Cottonseed oil
  aluminum-pillared clay for bleaching, an optimization study, 599
  extraction of, with acetone/hexane mixtures, 609
Crystallization, of hydrogenated cottonseed oil, 7, 8, 9–10, 12
Crystal morphology
  microstructure and textural properties of model lipid systems, 399
  of hydrogenated cottonseed oil, 7

D

Deacidification, of soybean oil by supercritical fluids and membrane technology, 803
Deep-fat frying, oxidative stability of oil and nutraceutical uptake during, 753
Dewaxing, of crude rice bran oil, 57
Diacylglycerols
  in polymorphic transitions of tristearin, 13, 14, 15, 16
  screening of commercial lipases for synthesis of, 329
Dielectric constants, equations for correlation with homolog chain lengths, 771
Differential scanning calorimetry, to detect crystallization of hydrogenated cottonseed oil, 7, 9, 12
Dioxins, removal of PCB and, from fish oil by activated carbon, 593
Discriminant analysis, to detect hydrocarbon content of virgin olive oils, 1, 2, 4
Droplet formation, in water-in-oil-in-water emulsions, 65, 67, 68, 69, 70

E

Emulsification
  membrane, 73, 77
  microchannel, 65–70, 73, 77

Copyright © 2005 by AOCS Press

Emulsions
characterization of fish oil-in-water, by light-scattering nuclear magnetic resonance and gas chromatography-headspace analysis, 797
preparation of water-in-oil, using microfluidization, 65
production of, with a micromachined device, 73
stability of water-in-canola oil, 159

F

Fat content of foods, depends on the method of determination, 767
Fat/oil blends, computational estimates from gas and liquid chromatographic data, 707
Fatty acid(s)
in food-grade rice bran wax, 57–62
in *Moringa oleifera* oilseeds, 49, 50
in *Passiflora* seed oils, 41–44
Fatty acid methyl esters
adsorption behavior of, from hexadecane by friction measurements, 293
in *Passiflora* seed oils, 42
production of, from acid oil using immobilized lipase, 825
Fatty alcohols, in food-grade rice bran wax, 57–63
Fatty amide polyols, preparation of, with oat seed peroxygenases, 481
Fatty amides, characterization of, from lipase-catalyzed amidation, 501
Ferulic acid and esters, addition of, to salad oils and frying oils, 647
Flax, determination of fatty acids in, and in canola and solin by near-infrared spectroscopy, 153
Flaxseed oil, sensory and oxidative stability of screw-pressed, 887
Frying, accumulation of iron from meat in cooking oils during, 249
Frying oils, use of linalyl oleate as an autoxidation inhibitor, 433

G

Gevuina avellana, characterization of proteins from seeds of, 169
Glycerolysis, of soybean oil using supercritical carbon dioxide, 613
Gossypol, removal from cottonseed miscella by adsorption, 905
Grafting, of passion fruit varieties, 41, 42, 43, 44

H

Hazelnut oil
enrichment of n-3 polyunsaturated fatty acids with lipase, 27
lipase-catalyzed acidolysis of, 27, 29, 31, 32
sterols in, 717
High-oleic, high-palmitic sunflower oil, performance of, during industrial frying of nuts, 505
Hydrogenated cottonseed oil
crystallization behavior of, 7, 8, 9, 10, 11
crystallization behavior of, in canola oil, 8, 9, 10, 11, 12
solid fat content of, 8, 9, 11
Hydrogenation, monitoring of, with catalyst ratios, 925

I

Ice creams, effects of formulations on the thermal behavior of, 427
Immobilized lipase, selectivity of *Thermomyces lanuginosa* in interesterification, 737
Iodine value, of *Passiflora* seed oils, 41, 43
Iron, accumulation in cooking oils during frying, 249

J

Jojoba oil, chemical reactivity of the wax as affected by chain length, 373

L

Lactic acid, esterification with alcohols *via* lipase, 881
Laurel fruit oil, characterization of, from Portugal, 863
Lecithin
extraction of egg yolk, 565
fractionation and characterization of, from egg yolk, 571
Lesquerella fendleri
albumin fraction of, 53, 54, 55, 56
characterization of protein in, 53
fractionation and characterization of proteins from, 53
nitrogen solubility of, 53, 54, 56
nonprotein nitrogen in, 53, 54
Linoleic acid
in *Passiflora* seed oils, 41, 42, 43, 44
oxidation kinetics of, in the presence of saturated acyl L-ascorbate, 389
α-Linolenic acid, in *Passiflora* seed oils, 41
Lipase
acidolysis of high-laurate canola oil with eicosapentaenoic acid, 875
esterification of saccharide–fatty acids with, 487
incorporation of steric acid into palm olein and palm kernel oils by, 421
Lipoxygenase, assay for activity of inorganic solvent media, 817
Lupinus albus protein, effects of heat and pH on properties of, 135
ε-Lysine acylase, synthesis of, from *Streptomyces*, 631

M

Microfluidization, to prepare water-in-oil-in-water emulsions, 65–68, 70
Milk fat substitutes, production of human, with enzymes and response surface methodology, 549
Monoacylglycerols
optimization for synthesis of, by enzymes in solvents, 559
rapid synthesis from palm-based oils, 791
synthesis of, from conjugated linoleic acid by lipase, 619
Monodisperse emulsions, 65, 68, 69, 73, 78
Monoglycerides, response surface methodology to optimize production of, 673
Monooxygenase, palmitic acid oxidation products from, 839
Moringa oleifera oilseeds
interprovenance variation in oil content of, 45, 48, 50
oil content of, from Pakistan, 45–48
Mycolic acid, synthesis of biosurfactants from, and physical and surface-active properties of, 181

O

Oleic acid
content of *Moringa oleifera* oilseeds, 45, 50
content of *Passiflora* seed oils, 41, 42, 43, 44
hydrochlorination, kinetics of, and Henry's constant, 917
Oleic succinic anhydrides, synthesis of, and structure–property relations, 271
Oleic-rich oil, use of nuclear magnetic resonance to study thermal oxidation in, 349
Oleochemical carbonates, physical properties of, 201
Oleuropein, oxidation of, 335
Olive oil(s)
activation energy concept to predict quality reduction in packaged oils, 119
comparison of color scales and effects of ripeness, variety, and harvest season, 21
effect of herbs on degradation of, in canned tomatoes, 759
effect of storage on pigments, 33
hydrocarbon content of, 1
influence of olive harvest season on color, 21, 22
relationship between, and walnut oil in fatty acids and volatile flavor components, 105
role of, amphiphiles on the stability of oil-in-water emulsions, 415
sterols as markers for adulteration of, 717
Olive ripeness, influence on olive oil color, 21–24
Olive variety, influence on olive oil color, 21–24
Omega-3 fatty acids, preparation of structured lipids from long-chain, and high-laurate canola oil, 731
Oxidative stability, of *Moringa oleifera* oilseeds, 46, 48, 49

P

Palmitic acid, in *Passiflora* seed oils, 41, 42
Palm oil, formulation of zero-*trans* shortenings and margarines from, a review, 775
Passiflora seed oils, fatty acid profiles of, from Uganda, 41
PCB, removal of dioxins and, from fish oil by activated carbon, 593
Peanut cultivars, new high-oleic lines grown in the southwestern United States, 125
Peracetic acid, prediction of equilibrium constant by formation of, from hydrogen peroxide, 301
Phenolics, radical scavenging activity of, from canola hulls, 255
Phosphatidylcholine, enrichment of, with palmitic and stearic acids by lipase, 727
Phospholipases, a review of the occurrence and production of, by microorganisms, 691
Phospholipids, incorporation of laurate and hydroxylaurate into, with castor microsomes, 495
Phytate, simple procedure for determination of, in soybeans and soy products, 81
Phytosterols, in cereal by-products, 439
Pistachia atlantica, composition of triacylglycerols from, from Algeria, 93
Polarized light microscopy, to detect crystallization of hydrogenated cotton seed oil, 8, 10, 11, 12
Polymorph, regulating $\beta' \rightarrow \beta$ transition in fats, 7
Polymorphic transitions, of tristearin, 14, 16, 18
Polymorphism, of hydrogenated cottonseed oil, 7, 8, 9
n-3 Polyunsaturated fatty acids, enrichment of hazelnut oil with, 27, 30, 32
Polyurethane networks, from soy polyols and their synthesis and mechanical characterization, 365
Powder X-ray diffraction, to detect crystallization behavior of hydrogenated cottonseed oil, 8–9
Proteins, characterization of, in *Gevuina avellana* and *Rosa rubiginosa* seeds, 169

Q

Quasi-monodisperse emulsions, 73

R

Rapeseed, increasing erucic acid content through genetic modification for high oleic acid, 445
Response surface methodology (RSM), to characterize the acidolysis of n-3 polyunsaturated fatty acids with hazelnut oil, 27, 28, 32
Rice bran, phytosterol content of aqueous extracts of, 463
Rice bran oil, physical refining of, by simultaneous degumming and dewaxing, 213
Rice bran wax
  crystal growth of, in hexane, 229
  physicochemical characteristics of, 59, 60, 61, 62, 63
  policosanols in, 57, 62
  preparation of food-grade, and its composition, 57
Rosa rubiginosa, characterization of proteins from seeds of, 169
Rubber seed oil, quality and authentication of, 465

S

Salmon oils, properties of, from fish heads, 147
SDS-PAGE, to determine meal and protein fractions in *Lesquerella fendleri*, 53, 54, 55, 56
Sepiolite, bleaching with, for physical refining of rapeseed oil, 911
Solid fat content
  attenuation of ultrasonic waves and effects of microstructure on, 319
  in situ monitoring by nuclear magnetic resonance, 305
  new technologies to determine on-line, 313
Solin, determination of fatty acids in, and in canola and flax by near-infrared spectroscopy, 153
Soybean oil
  glycerolysis of, using supercritical carbon dioxide, 613
  maleation of, by a single-step process, 189
  ozone-mediated polyol synthesis from, 653
Soy protein(s)
  effects of alkali on refunctionalization by hydrothermal cooking, 451
  influence of genotypic variation on emulsifying properties of, 667
  thermal properties and adhesiveness of modified, with cationic detergent, 357
  use of nuclear magnetic resonance spectrometry to predict, from oil measurements, 87
Squalene, nuclear magnetic resonance to determine yields of, during epoxidation, 409
Stearic acid composition, of *Passiflora* seed oils, 41, 42, 43, 44
Sterols, in *Moringa oleifera* oilseeds, 45, 47, 49, 50
Structured phospholipids, production of, with lipases from *Thermomyces lanuginosa*, 237
Sucrose polyesters, to stabilize tristearin, 13, 14, 15
Sunflower oil
  enthalpies of mixing of a mixture of, and alcohols at 298.15 K, 141
  enzymatic hydrolysis of, in a high-pressure reactor, 543
Supercritical carbon dioxide, glycerolysis of soybean oil using, 613

T

Terpenes, isomerization of, by sulfated zirconia, 531
Thermal heating fluids, determination of, in oleochemicals by high-performance liquid chromatography, 233
Tocopherols, in *Moringa oleifera* oilseeds, 46–47, 48, 49
Transesterification, of Brazilian vegetable oils over ion-exchange resins, 661
Tristearin, stabilization of polymorphic transitions by diacylglycerols and sucrose polyesters, 13, 15, 16, 17, 18

U

Uniform Oil Color Scale (UOCS), to assess virgin olive oil color, 21, 22, 23, 24
Unsaturated fatty acid composition, of *Passiflora* seed oils, 41, 42, 43, 44

V

Virgin olive oils
  alkanes in, 1, 2
  alkenes in, 1, 2
  authenticity of using a pigment profile, 33
  CIELAB color differences, 21, 22, 23, 24
  hydrocarbon content of, 1, 2
  pigments in, 33, 34, 35, 36, 38
  sesquiterpenes in, 1, 2
  storage of, 33, 34, 35, 36, 37, 38
  transformation of chlorophyll into pheophytins in, 38
Vitamin E, estimation of, by high-performance liquid chromatography in olive-based foods, 129

W

Walnut oil, relationship between, and olive oil in fatty acids and volatile flavor components, 105
Water-in-oil-in-water emulsions, 65, 66, 67, 68, 69, 70

X

X-ray diffraction, to detect polymorphic behavior of hydrogenated cotton seed oil, 7, 8, 11
